PROFESSIONAL SUMMARY

Motivated IT undergraduate with hands-on experience building and deploying AI-powered full-stack applications. Passionate about LLM integration, prompt engineering, and backend systems. Experienced with Groq/LLaMA APIs, RESTful API design, and modern JavaScript/Python ecosystems. Eager to contribute to production-grade AI products at a fast-moving startup.

TECHNICAL SKILLS

AI & LLMs	OpenAI / Anthropic / Groq APIs, LLaMA 3.1, Prompt Engineering (few-shot, chain-of-thought), LLM API Integration, Structured Output Design
Languages	JavaScript (ES6+), Python, C#, TypeScript (basic)
Frontend	React.js, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, FastAPI (learning), Django, REST API Design, Async Processing
Databases	MongoDB, SQL
Tools	Git, GitHub, Postman, Docker (basic)
Concepts	Scalable Systems, Authentication, API Design, PDF Parsing, Real-time Processing

PROJECTS

AI-Powered ATS Resume Analyzer

2025

[Node.js](#) · [Express.js](#) · [Groq API \(LLaMA 3.1\)](#) · [pdfjs-dist](#) · [Render](#)

- Designed and implemented structured prompts for LLM-based resume evaluation, producing consistent ATS scores, keyword extraction, and improvement feedback
- Built few-shot style prompt workflows for job-description matching — comparing resume content against role requirements with targeted gap analysis
- Developed RESTful API backend handling AI inference requests, PDF/TXT parsing, async file processing, and response formatting
- Deployed full-stack app on Render with real-time processing; live at ai-resume-analyzer-nlsb.onrender.com

Live Project: <https://ai-resume-analyzer-nlsb.onrender.com/>

RecruitMate — Campus Placement Companion (currently ongoing)

2024

[React.js](#) · [Node.js](#) · [MongoDB](#) · [REST APIs](#)

- Built full-stack application with JWT authentication, resume management, and modular backend architecture for scalability
- Designed REST APIs with async handling for AI-driven modules including mock interviews and ATS-based evaluation systems
- Planned integration with enterprise workflows and external AI APIs for automated candidate screening

Laundry Order Management System

[React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#)

- Developed a full-stack laundry order management web application for handling customer orders and tracking laundry services.
- Implemented features such as order placement, status tracking, customer management, and responsive UI design.
- Built RESTful APIs for efficient communication between frontend and backend services.
- Managed database operations using MongoDB for storing customer and order details securely.
- Deployed the application using Render for online accessibility.

Live Project: <https://laundry-order-management-1-nl9v.onrender.com/>

SpendWise AI – Personal Finance Management Platform

Next.js, TypeScript, AI Integration, Tailwind CSS

- Developed an AI-powered personal finance management application to help users track and manage expenses efficiently.
- Designed a modern and responsive user interface using Tailwind CSS.
- Integrated AI-based functionalities to provide smarter financial insights and expense analysis.
- Implemented secure and scalable frontend architecture using Next.js and TypeScript.
- Deployed the application on Vercel for fast and reliable hosting.

Live Project: <https://spendwise-ai-nine.vercel.app/>

EXPERIENCE

Frontend Development Intern — Metaloop Global

May 2025 – June 2025

- Built responsive UI components using React.js and improved frontend structure and performance
- Collaborated with backend team on API integrations and optimized usability across devices

EDUCATION

B.Tech, Information Technology — LBS Institute of Technology
for Women

2023 – 2027

Currently pursuing btech in IT 3rd Year

CGPA: 7.78 / 10

INTERESTS

AI Product Development • LLM Applications & Agent Systems • Prompt Engineering • Backend Systems • Enterprise AI Integration • Frontend Development
